

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PROCEEDINGS
OF THE
AMERICAN ACADEMY
OF
ARTS AND SCIENCES.

NEW SERIES.

VOL. XIV.

WHOLE SERIES.

VOL. XXII.

FROM MAY, 1886, TO DECEMBER, 1886.

SELECTED FROM THE RECORDS.

BOSTON:
UNIVERSITY PRESS: JOHN WILSON AND SON.
1887.

CONTENTS.

	PAGE
I. <i>Observations of the Mean Right Ascension of Certain Polar Stars, made at the Field Memorial Observatory of Williams College, and reduced to the Epoch 1884.0.</i> By TRUMAN HENRY SAFFORD	1
II. <i>Thunder-Storms in New England in the Summer of 1885.</i> By WILLIAM MORRIS DAVIS	14
III. <i>A Preliminary Synopsis of North American Carices, including those of Mexico, Central America, and Greenland, with the American Bibliography of the Genus.</i> By L. H. BAILEY, JR.	59
IV. <i>Contributions from the Chemical Laboratory of Harvard College.</i>	
I. <i>Analysis of Mica from Leon Co., Texas.</i> By GEORGE W. LEIGHTON	158
II. <i>Analysis of a Crystalline Scale formed in the Manufacture of Sodid Bicarbonate by the Ammonia Process at Syracuse, N. Y.</i> By GEORGE W. LEIGHTON	159
III. <i>On the Constancy in the Heat produced by the Reaction of Argentic Nitrate on Solutions of Metallic Chlorides.</i> By THEODORE W. RICHARDS	162
IV. <i>Is there a Constant Relation between the Heats of Formation of Chlorides and Sulphates in Aqueous Solution?</i> By IRVING W. FAY	164
V. <i>A Method for the Separation and Estimation of Boric Acid, with an Account of a Convenient Form of Apparatus for Quantitative Distillations.</i> By F. A. GOOCH	167

	PAGE
VI. <i>A Method for the Separation of Sodium and Potassium from Lithium by the Action of Amyl Alcohol on the Chlorides, with some Reference to a similar Separation of the same from Magnesium and Calcium.</i> By F. A. GOOCH	177
VII. <i>On the Anatomy and Development of Agarum Turneri.</i> By JAMES ELLIS HUMPHREY	195
VIII. <i>On the Morphology of Ravenelia Glandulæformis.</i> By G. H. PARKER	205
IX. <i>Experiments on the Melting Platinum Standard of Light.</i> By CHARLES R. CROSS	220
X. <i>The Inverse Electromotive Force of the Voltaic Arc.</i> By CHARLES R. CROSS AND WM. E. SHEPARD	227
XI. <i>On the Direct Conversion of Aromatic Sulphonates into the Corresponding Amido Compounds.</i> By C. LORING JACKSON AND JOHN F. WING	245
XII. <i>On Benzyltrimethylamine.</i> By C. LORING JACKSON AND JOHN F. WING	249
XIII. <i>A New Method for the Quantitative Determination of Hydroxyl.</i> By C. LORING JACKSON AND G. W. ROLFE	253
XIV. <i>On Certain Cultures of Gymnosporangium, with Notes on their Ræstelice.</i> By ROLAND THAXTER	259
XV. <i>Contributions to American Botany.</i> By ASA GRAY	270
XVI. <i>On Mucoxybromic and Mucoxychloric Acids.</i> By HENRY B. HILL AND ARTHUR W. PALMER	315
XVII. <i>A Determination of the Relation of the Atomic Weights of Copper and Silver.</i> By THEODORE W. RICHARDS	342
XVIII. <i>On Benzoltrisulphonic Acid.</i> By C. LORING JACKSON AND JOHN F. WING	348
XIX. <i>On the Action of Nitric Acid on Symmetrical Trichlorbenzol.</i> By C. LORING JACKSON AND JOHN F. WING	372
XX. <i>Observations of Variable Stars in 1886.</i> By EDWARD C. PICKERING	380

CONTENTS.

vii

	PAGE
XXI. <i>Contributions to American Botany.</i> By SERENO WATSON .	396
XXII. <i>On the Behavior of Sound and Decayed Wood at High Temperatures.</i> By HENRY B. HILL AND ARTHUR M. COMEY	482
XXIII. <i>The Efficiency of Small Electro-motors.</i> By H. E. H. CLIFFORD	493
PROCEEDINGS	499
MEMOIRS: —	
Charles Francis Adams	517
Nathaniel Ellis Atwood	522
Ephraim Whitman Gurney	523
William Ripley Nichols	528
Charles Callahan Perkins	534
Henry Hobson Richardson	539
Leopold von Ranke	542
